NEW YORK WORLD'S FAIR

June 4, 1964

To: K. Cronk

It has been brought to the attention of the writer that the Window Washers have been careless working throughout the planted areas around the building. Both flowers and ground cover being trampled - Also buckets of dirty water are being emptied on plants and in planter tubs.

You are requested to take Corrective Action -

On previous occasions I have expressed my dissatisfaction with the window wash performance. Perhaps we should make a change.
