Intra-Company Communication

NEW YORK WORLD'S FAIR

July 31, 1964

TO: C Gayle Warnock

Andy Puky, of Maintenance, has advised that the Service area millwrights contributed a great deal to yesterday's record. There was a leak in a Mustang tire, and rather than stop the track for repairs, they chose to put air in it each time around -- and this required their performing the air operation 35 times.

A note from you, thanking them for this cooperation, certainly would be in order.

D. G. Dowling

TO: THE SERVICE AREA

May I add my thanks to those already expressed by others in the organization for the heroic efforts of the millwrights in their contribution to yesterday's record.

Keeping air in the tire of a moving automobile is a pretty good trick and congratulations are well deserved.

C Gayle Warnock
Resident Manager
